REVENUE.

Proceedings of the Dewan to His Highness the Maha Raja of Mysore, (Revenue),—dated 22nd April 1881.

No. 516-25—4, DATED BANGALORE, 22ND APRIL 1881.

ORDER THEREON.—The usual details of the proposed settlement are given in the Superintendent's report dated 23rd February 1881. The result of the settlement exclusive of local cess is an increase of Rs. 11,030 which is distributed on the several descriptions of land, as shown in the following statement:—

Description.	Acres by Survey.	Old.				New.			
		Collections.	Average Rate.			Assessment.	Average Rate.		
1	2	3	4			5	6		
Garden	83	195	2	5	7	381	4	9	5
Rice	7,225	30,511	4	3	7	37,357	5	2	9
Dry crop	14,086	4,885	0	5	7	8,883	0	10	2
Total.....	21,394	35,591	1	10	7	46,621	2	2	10

2. The increase in the wet assessment results as usual from the correction of inequalities in the old assessment, under which lands used to be largely held by favored individuals on light rates. There is no reason to consider that the rates now fixed are unduly high. The maximum rice rate adopted is but 8 annas higher than that fixed for the neighbouring Taluk of Belur, this small increase being fully warranted by the superior advantages of position enjoyed by the maganis under notice. If the resulting average assessment on the whole area of the wet lands in these maganis is much higher than that of the Belur Taluk, it is due to the lands in them being more uniform in quality. The wet arable lands not yet taken up are very small in extent.

3. The complaint generally made by ryots in regard to wet assessment, and with some reason, does not refer so much to the heaviness of the assessment itself, as to the hardship of their being called upon to pay these heavy rates of assessment combining as they do a water charge, even in years during which lands are laid waste from want of water. An alteration of the rule in this respect will, it is believed, encourage the ryots to take up wet lands more readily, and the Survey Superintendent is requested to report on the suggestion made on this point in Proceedings dated 29th March 1881.

4. The garden lands are small in extent and unimportant.

5. The addition made to the assessment on dry lands is apparently large, but there is reason to believe that this is chiefly due to a much larger area of dry lands having been measured in the survey as under occupation than is really the case. It cannot be believed that in these Malnad and Semi-Malnad Maganis, out of a total arable area of about 19,000 acres of dry land, 14,000 acres are annually under occupation. It may therefore be expected that a considerable portion of this area will be resigned when the increase of revenue above referred to under this head will, to a

great extent, disappear. An average assessment of annas 10 pies 2 per acre cannot be considered high for Semi-Malnad Maganis in which dry cultivation is carried on as profitably as in the Maidan country, and enjoys greater advantages in some respects. The incidence of the dry assessment on the purely Malnad magani of Palya cannot be judged, as the statistics in the report have not been separately given for this magani, but it is observed that a lower maximum rate has been adopted for the magani, and the average rate must be lower in proportion.

6. It is noticed that the results of the settlement in individual villages do not as compared with former revenue, show such great fluctuations as were observed in other taluks.

7. The Dewan, under the circumstances, sanctions the introduction of the proposed settlement with the usual guarantee for 30 years. The Deputy Commissioner and the Settlement Officer will have an opportunity, in carrying out the settlement, of judging whether the rates bear with undue hardship in any case.

8. The Dewan is glad to find that the Survey Superintendent has made arrangements for breaking up all unduly large Survey fields. Such sub-divisions of fields are particularly required to separate different descriptions of land, dry, wet and garden, included in one and the same field. The Survey Superintendent is requested to report hereafter what arrangements he would propose for carrying out a similar improvement in the taluks already settled in which the subject has given rise to considerable complaint on the part of the ryots.

R. VIJAYINDRA RAO,
Secretary.

To—The Survey Superintendent in Mysore.
„ Deputy Commissioner, Hassan District.
„ Deputy Commissioners of other Districts.
„ Comptroller.

No. 259.

SURVEY SUPERINTENDENT'S OFFICE,
Dated Balehonnur, 16th April 1881.

From

The Superintendent, Revenue Survey and Assessment, Mysore.

To

The Secretary to the Dewan to His Highness the Maha Raja of Mysore.

SIR,

I have the honor to submit for the orders of Government the marginally noted papers on the subject of the revision of the assessment in three maganis of the Hassan Taluk of the District of the same name.

1. Survey Superintendent's Report No. 130, dated 23rd February 1881, together with its accompaniments.
2. Survey Superintendent's letter No. 131, dated 23rd idem, to the Deputy Commissioner, Hassan District.
3. Hassan District Deputy Commissioner's letter No. 20, dated 9th April 1881.

2. The Deputy Commissioner, it will be observed, is, on the whole, of opinion that the proposed rates are somewhat higher than the circumstances of the tract under report warrant. I pass over the question, raised by the Deputy Commissioner in paras 3 and 4, of Colonel Hill's average rates and calculation of the yield of rice per acre being fallacious or the reverse, as I have no wish whatever to base any justification of the proposed settlement on the establishment of those points. In para 33 of my report it will be observed that I disclaim any intention of justifying my proposals by quoting Colonel Hill's figures.

3. The question really at issue is whether the rates now proposed are too high or not. The Deputy Commissioner thinks they are, but I must confess I should have felt myself better able to deal with the present question had he stated more fully the grounds for that opinion. If, as suggested by the Deputy Commissioner, the Belur Taluk maximum rice rates were substituted for the rates now proposed we should have Rs. 8—8—0 and Rs. 8 instead of Rs. 9 and Rs. 8 respectively in the two groups into which I have divided these villages ; and the result would be a reduction in the estimated increase by the settlement of an amount a little under Rs. 500, while the average rate on the whole extent of rice land instead of being Rs. 5—2—0 would be Rs. 5—1—0 per acre, a difference of about one anna. In para 32 of my report, I gave my reasons for adopting a maximum rice rate eight annas higher, in the first group now under report, than in the first group of the Belur Taluk, and at the same time explained that the difference in the average rice rate was due to the superiority and, consequently, higher classification of the Hassan lands as compared with those of the Belur Taluk.

4. The past revenue history and general circumstances of the tract under report were fully entered into in my original report. I there showed a steadily maintained revenue, for many years preceding the settlement, an absence of remissions and an area recorded in the old accounts as occupied which was not within one-third of the true area now measured. I would invite attention to the financial aspect of the question as touched upon in para 42 of my report. I do not think the net results of the settlement will be very greatly in excess of the assessment hitherto realized. Some land will be relinquished but not on account of any pressure of the Survey assessment. The first point on which to be satisfied is that the rates are not too high, a point on which I have not the slightest misgiving, for these rates are in accordance with our past experience and are I submit intrinsically moderate. If, with the conviction that the rates are not too high, the increase involved in my proposals be reduced by a few thousands, the amount so reduced must be a dead and uncalled for loss of revenue, for it will not, in my opinion, be counterbalanced by any taking up of fresh land or by fewer resignations, as a consequence. The ryots in deciding what land to keep and what to resign will be guided more by their available stock and means of cultivation than by any consideration of the Survey rates.

5. The probability of the continuance or the reverse of high prices, alluded to by the Deputy Commissioner in para 5, must of course command attention, but unfortunately any forecast on the subject is impossible. So far as the figures in my report go we are taken up to 1880 only when there was a considerable fall in prices and, while I write, there has been a very much greater fall. In Chikmagalur 10 days ago rice was sold at 16 seers for one rupee. I quite agree with the Deputy Commissioner that it would not be safe, for the purposes of the present settlement, to take eight

rupees per palla of rice as the average price. I have not however allowed any consideration of so uncertain a character as that of future prices to influence me in fixing the rates now under discussion.

6. I shall not follow the Deputy Commissioner further in his remarks. I have already shown that only a very small reduction of less than Rs. 500 would result from reducing the rice maximum in group I from Rs. 9 to Rs. 8—8—0 to fit in with the highest rice maximum in the Belur Taluk and I am unable, considering the relative circumstances of the two tracts, to recommend the change suggested.

7. The subject of the Deputy Commissioner's para 8 is one of very great importance, and I shall take steps for having all unduly large Survey fields broken up at the settlement. In 1879 I became convinced of the necessity for reducing the size of Survey fields under all heads and I then issued rules the effect of which will be to remove all possible ground for complaint on the part of the ryots in all taluks measured since 1879. The general effect of the rules in question will be to give the *average* size of Survey fields as shown in the margin. The standard size of fields proposed by the Deputy Commissioner admits of two views, for although such small fields would possess certain advantages, on the other hand the complaints of the ryots on the score of boundary marks and for other reasons would be far louder at the time of measurement than they have recently been regarding the Survey fields being too large. The expense moreover would be very great.

	Acres.
Dry crop ...	... 6
Wet ...	... 2

8. I trust sanction may be accorded to my proposals in their integrity. The small reduction of Rs. 500 entailed in the Deputy Commissioner's proposals is scarcely appreciable and if carried out would in a measure lay the settlement open to a charge of inconsistency.

9. I shall be prepared to give out the rates at once and I have therefore the honor to solicit early sanction.

I have the honor to be

Sir,

Your most obedient Servant,

J. P. GRANT,

Superintendent, Revenue Survey and Assessment.

No. 130.

SURVEY SUPERINTENDENT'S OFFICE,
Dated Bangalore, 23rd February 1881.

From

The Superintendent, Mysore Revenue Survey.

To

The Survey and Settlement Commissioner of Mysore.

SIR,

I have the honor to submit the following proposals for the revision of the assessment in 130 villages, representing the Government portion of the three maganis, as per margin, of the Hassan Taluk of the District of the same name.

Alur, Palya, Chik-Kanagál.

2. It has not been found practicable to extend the proposed settlement to the whole of the Hassan Taluk, owing to the unadvanced state of measurement and classification, but as the three maganis in question represent a fairly extensive tract of country, possessing considerable individuality both in its revenue limits, forming as it once did the old Maharajandurga Taluk, and also in its general features, I considered it advisable to take up its settlement and thus clear the way towards the future settlement of the whole taluk which has presented the most unusual obstruction to survey operations, from causes fully explained in our progress reports.

3. The maganis under report contain the following villages and tenures :—

No.	Magani.	Government Villages.	Inam Villages.	Kavals.	Total.	Remarks.
1	2	3	4	5	6	7
1	Alur	54	1	1	56	
2	Palya	40	8	...	48	
3	Chik-Kanagál	36	4	...	40	
3	Total.....	130	13	1	144	

General Description.

4. The tract under report is the western-most portion of the Hassan Taluk. It lies in the basin, and to the south-west of, the Yagachi river, the chief tributary of the Hemavati, which latter the Yagachi joins some few miles south near Gorur in the Arkalgúd Taluk. The Alur and Chik-Kanagál Maganis lie close up to the river and are comparatively level, with stretches of rice in the valleys, the uplands presenting the appearance of open downs, now grassy, and again covered with small scrub jungle. The Palya Magani is nearer the true Malnad and is less open and more undulating. The whole tract, although wanting in the more wild beauty of the adjoining Malnad, presents a very pleasing landscape the chief characteristic of which consists in the fine breezy uplands which are quite peculiar to the western parts of Hassan.

Climate, Soils and Productions.

5. The climate and soils are well suited to the production of rice of a superior description but sugar-cane is raised only under the very best of a very large number of somewhat unimportant tanks. Garden produce there is almost literally none. Dry crops, although coming more into favor year by year, are held in far less esteem than the more remunerative rice cultivation. Towards the west a heavy monsoon is fatal to dry crops, but if the rain-fall be light there is often an excellent out-turn.

Rain-fall and climate.

6. The rain-fall is supposed to be about 65 inches, but notwithstanding the comparatively small extent of country we are now dealing with, has room to fall very unequally, for the line where dry cultivation ceases to be held in much estimation may be found near Palya. The extraordinarily rapid transition of climate in regions bordering the ghats and Malnad of Mysore, thereby exerting a very wholesome influence or the reverse on dry cultivation, is too well known and recognized to require description or to be enforced by argument. The fact is one of much importance as regards the objects of this report and must be kept in sight. As regards rice cultivation, I believe the climate to be favorable throughout.

7. Coffee has not taken any great hold on the tract under report, the only important cultivation of that kind being in the extreme south-west where Manjarabad adjoins. There are in all only about 1,285 acres held on coffee patta.

Coffee.

8. While all the villages under report are fairly accessible, those in the centre of the tract adjoining the imperial road from Hassan to Saklespur have a great advantage in respect of communications. Alur represents the most important trading point, not only because Alur is itself a fairly well attended market town, but it is near the direct road to Hassan which is only some 10 miles distant and very much more important as a market than Alur itself.

Roads and Markets.

9. The classification papers furnish the following statistical information regarding the Government villages :—

Statistics.

No. of Villages.	Houses.	Population.	Square Miles.	Cattle.	Carts.	Ploughs.	Markets.
180	3,065	14,421	73	26,049	180	3,412	1

10. The manner in which the villages under report have been divided up by survey is shown below :—

Result of Measurements.

Description of Land.	Government.		Inam.		Total Government and Inam.		Grand Total, Government and Inam.
	Occupied.	Waste.	Occupied.	Waste.	Occupied.	Waste.	
1	2	3	4	5	6	7	8
Garden	83	...	2	...	85	...	85
Rice	7,225	359	713	...	7,938	359	8,297
Dry crop	14,086	5,320	1,087	...	15,173	5,320	20,493
Total....	21,394	5,679	1,802	...	23,196	5,679	28,875
Unculturable including tanks, roads, &c. ...	...	...	...	...	...	...	16,417
Area of 1 Kaval	...	...	...	...	...	...	1,409
Total Area of 13 Inam Villages	...	...	...	...	...	...	4,661
Gross Area of the Alur, Palya and Chik-Kanagál Maganis under report ...	...	...	...	...	...	...	51,362

11. Viewing the statements in the two preceding paras together, we find the population on the whole area, arable and unarable, to be 198 to the square mile ; on the occupied area however we have 437 to the square mile which, considering the large proportion of dry crop land under occupancy, denotes a density of population a good deal over the average in Mysore.

Remarks on Population, &c.

12. There is the usual disparity between the census of 1871 and the classing census which, since the famine, we find even in the most prosperous districts which are well known to have been directly untouched by that disaster. Incorrect enumerating will not alone suffice to afford the necessary explanation of the difference, and we must believe, as it is not at all difficult to do, that the effect of the famine has been to greatly disturb population, even in well-to-do tracts, by creating abnormal demands on labor and enterprize in other places throughout the country. The population by the census of 1871 was 20,933 against only 14,421 according to classification returns.

We must first allow for 13 inam villages not included in this report. These 13 villages in the census of 1871 contained about 1,900 people, so that the figures are reduced to 19,033 against 14,421 by the survey. Making a still further allowance for the moving population which is not so likely to be recorded in the classification census, the difference becomes less startling, but yet there can be little doubt that whatever the true reason may be the population has suffered as a result of the famine, during the years of the continuance of which there was in all parts of the Province a greater amount of epidemic and sickness, although not starvation, than in normal years.

13. That the loss of population has been very severe or detrimental to the well being of the prosperous tract of country under report, I do not believe. It may reasonably be supposed that the chief loss has been amongst the weak and sickly, the more especially as we find that the cultivating power of the tract does not appear to have been in the least affected, to judge by the fact that more land was under occupancy during the famine years than at any other time since 1866. From the statement at para 10 it will be seen that only 359 acres of rice, the most valued cultivation, are waste. Of the whole of the arable dry crop lands about 27 per cent are waste which, in an essentially dry crop country, would be a large proportion but not in a country in which, as we have seen, dry crops are held in comparatively light estimation in some parts.

Condition of the people.

14. On the whole I am inclined to look up the ryots of these villages as quite on a par, in their circumstances generally, with those of the neighbouring parts of Belur. They are described by the Deputy Commissioner as intelligent and enterprising above the average and, as already shown, they possess considerable advantages in point of climate and position with reference to markets and roads. The classing returns give only 180 carts, large and small, which number somewhat jars with the statement made by the Deputy Commissioner at para 9, as 180 is not a very large number. It is possible that a good many may have been away at the time of classification, engaged in the usual trade.

Past revenue management.

15. The past revenue management of the villages under report has not, from all I can gather, been upon any homogeneous basis. The basis of the assessment in some of the western villages has been the old shist established by the rulers of Vijayanagar which was fixed for each village and distributed over the wargdars, by some internal arrangement the process of which we are not acquainted with, while in the villages in the more open country a "Ryotwar" assessment seems to have been attempted. In neither case was any equal basis of assessment adopted, but I think the probability is that under the ryotwar or kulawar assessment a little more revenue was secured. It is impossible to draw the line between the two systems, nor would it be of much use to do so, as under neither system was there any measurement of the land. The Vijayanagar shist was disturbed by Pármaiya in favor of the batayi system. This latter was again commuted into money payment in the year Manmatha by Mallappa, the Amildar of Maharajandurga, and the operation is said to have been attended by such forcing of the revenue, especially by bringing the land up to its "Chadsál" or the highest rate that had ever been paid for each field, that the reactions peedily came and the revenue fell off. Then came a decreased demand which enabled the country to recover from the oppressive settlement of Mallappa. From this time there is no record of any oppressive assessment such as the country had to bear formerly.

16. The custom of conceding the dry land, free of assessment, in addition to the wet lands, or at any rate of taking a very low assessment, was common until recent years.

17. The present rates are described by the Deputy Commissioner at para 14 of his letter. They are stated to be only two in number, on the wet lands, *viz.*, Rs. 4—8—0 and Rs. 6 or an average of Rs. 5—4—0 per acre. Dry land pays from Rs. 0—7—0 to Rs. 1—2—0 per acre or an average of Rs. 0—11—7.

18. If we seek for some trace of the effect of the various systems above described, as revealed by the survey, it is to be found in the inequality of the old assessment generally, especially as regards dry land. In some villages the dry land paid assessment, in others it paid next to nothing. This of course gives room for a very considerable enhancement of the revenue. In the case of wet lands also, the adoption of the more modern rates, without a general revision of the assessment, has tended to increase the general inequality. The average rates actually paid, as elicited by applying the survey area under each head to the actual realizations for 1879—80, are as below :—

Description.	Acres by Survey.	Collections of 1879—80.	Average Rate.
1	2	3	4
Garden	83	195	2 5 7
Rice	7,225	30,511	4 3 7
Dry Crop	14,086	4,885	0 5 7
Total.....	21,394	35,591	1 10 7

Now although the above average rates are not so very low, they are, even in the case of rice land, much lower than what we may suppose from the Deputy Commissioner's remarks at para 14 were considered fair rates and cheerfully accepted. As regards dry land the rates should undoubtedly be kept somewhat low, especially towards the west, where a heavy monsoon will sometimes quite destroy the dry crops of the year, while a light monsoon will not only save them but cause a very large yield. This speculation decreases towards the east and the cultivator of dry crop feels more security. Still, a rate of Rs. 0—5—7 per acre, as an average, is far too low and will easily bear raising. Garden lands are insignificant and no particular remark is required.

19. In the case of both rice and dry lands the actual assessment is most unequal, but as a natural result of the past system, the dry land assessment shows the widest extremes being nothing, or next to nothing, in some villages and very heavy in others. Thus in Sapinhalli of the Alur Magani 75 acres of dry land pay 1 rupee; in Dadadhalli of the same magani 54 acres of dry land pay 1 rupee; in Manchenhalli of the same magani 68 acres of dry land are held for nothing at all and so on in a great many villages. On the other hand dry land is sometimes assessed pretty heavily, thus in Bartvalli of Alur 238 acres of dry land are assessed at Rs. 77; in Yediyur 333 acres of dry land pay Rs. 127. In the Palya Magani, where dry crop cultivation is held in comparatively light esteem, the most extraordinary extremes in the dry assessment are found, thus in Palya 286 acres of dry crop pay Rs. 137, while in Hidavanhalli of the same magani 124 acres pay 1 rupee. These are not stray instances by any means as can be readily ascertained by referring to the classvar statement A appended to this report. The fact is that the dry crop cultivation, although undoubtedly uncertain in parts of the tract, has been much underrated in the past. The Deputy Commissioner gives the *lowest* rate at 7 annas an acre, while I have shown the actual average to be only Rs. 0—5—7 per acre. The rates require to be brought up to a moderate but uniform standard which, as I shall show later on, can be very safely done.

20. In the case of the wet rates the errors of the system now to be superseded are not so conspicuous as in the case of the dry rates, but still great inequality is found to exist. The actual average rate paid, as shown in para 18, is Rs. 4—3—7, but has been attained at the expense of wide extremes, excessive assessment in some instances and evasion of anything approaching a fair assessment in others. I shall give some instances of this before closing this report. The rice lands are decidedly superior, a fact which was fully recognized by the framers of the old system of assessment, but it was not in their power, in the absence of any record of area, to apply any comprehensive scale of rates. The rice rates or, more correctly speaking, the rice assessment as a whole will easily bear a moderate increase.

21. The following statement shows the realizations for the last 25 years. To save space the price of rice, the only product to which we need pay much attention, is shown in the last column :—

Past collections and prices.

Year.	Bijvari in Khandis.	Collections.	Seers of Rice for one Rupee.
1	2	3	4
1855—56	833	28,543	22
1856—57	873	29,217	22
1857—58	883	29,419	18
1858—59	907	30,064	18
1859—60	930	31,598	16
1860—61	966	31,525	16
1861—62	980	32,244	15
1862—63	1,020	32,731	15
1863—64	1,090	33,456	12
1864—65	1,124	34,881	7
1865—66	1,165	35,040	7
1866—67	1,209	34,938	12
1867—68	1,139	35,678	11
1868—69	1,236	36,183	13
1869—70	1,407	35,021	10
1870—71	1,408	35,040	12
1871—72	1,413	34,858	12
1872—73	1,387	34,523	13
1873—74	1,334	33,861	16
1874—75	1,360	34,013	13
1875—76	1,394	34,731	8
1876—77	1,435	35,095	4
1877—78	1,454	35,474	4
1878—79	1,485	34,674	8
1879—80	1,519	35,591	12
Five years' average		35,113	
Ten years' average		34,787	
Twenty years' average		34,478	
Twenty-five years' average		33,586	

22. There has been a total absence of remissions and, to judge from the opinions of the Deputy Commissioner and the Officer in charge of classing operations, of any necessity for them. The bijvari shown in column 2 of the statement is the result I believe of arbitrary conversion of the local measure, whatever that was, into Krishnaraj measure; it can be viewed only relatively, or any light it can throw upon the area actually under occupancy. If the correct mode of conversion has been adopted, the occupied area according to the old accounts is only about 6,000 acres, while the survey shows it to be 21,394 acres. The year 1868—69 shows the highest point ever attained by the collections, a fact quite consistent with economic effects elsewhere throughout the Province. There has been great stability of the revenue since that time, the collections of the last four years showing remarkably well during a trying period. In 1868—69 the bijvari was 1,236 khandis and the collections Rs. 36,183; in 1879—80 the bijvari was 1,519 khandis and the collections Rs. 35,591. We clearly must not attach much importance to the entry of bijvari in these villages, but only to the actual realizations, the former being apparently no index whatever to the amount of the latter.

Grouping of villages and maximum rates of assessment.

23. The operation of grouping the villages under report, for the purpose of assessment, requires quite distinct treatment for the wet and dry lands. For wet cultivation, as I have already observed, the climate is throughout favorable and it is only necessary to put the few villages of this small tract, which have the immediate command of the imperial road from Hassan to Saklespur, into one group and all the rest into another group as below with the maximum rates of assessment indicated opposite each:—

Group.	Number of Villages.	Maximum Rice Rate.	Maximum Garden Rate.
I	23	9	16
II	107	8	

24. For the purpose of assessing dry crop lands I must adopt quite a different grouping, the main consideration being one of climate, position with reference to main road and markets being also kept in view:—

Group.	No. of Villages.	Maximum Dry Rate.	Remarks.
I	37	1—12—0	Eastern villages with certain climate less liable to heavy rains, and villages near Alur market and main road.
II	59	1—8—0	Villages further west and north, climate less favorable to dry cultivation and markets and roads more remote.
III	34	1—0—0	South-west villages nearer the Malnad dry crops liable to be lost from excessive rain.

25. Rice being the staple crop the grouping shown in para 23 will be adopted for the remainder of this report, dry crop being of subsidiary importance.

26. The assessment of the occupied land under the proposed settlement will be as follows:—

Result of the proposed rates on occupied lands.

Group.	Number of Villages.	Garden.			Rice.			Dry Crop.			Total.		
		Acres.	Assessment.	Average Rate.	Acres.	Assessment.	Average Rate.	Acres.	Assessment.	Average Rate.	Acres.	Assessment.	Average Rate.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
I	23	33	164	4-15-6	1,479	8,525	5-12-3	3,542	2,476	0-11-2	5,054	11,165	2-3-4
II	107	50	217	4-5-5	5,746	28,832	5 0-3	10,544	6,407	0-9-9	16,340	35,456	2-2-9
2	130	83	381	4-9-5	7,225	37,357	5-2-9	14,086	8,883	0-10-2	21,391	46,621	2-2-10

27. The next statement exhibits the assessment under the proposed settlement of the waste arable lands available for cultivation :—

Result of the proposed rates on waste lands.

Group.	Number of Villages.	Garden.			Rice.			Dry Crop.			Total.		
		Acres.	Assessment.	Average Rate.	Acres.	Assessment.	Average Rate.	Acres.	Assessment.	Average Rate.	Acres.	Assessment.	Average Rate.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
I	23	...	...	...	34	145	4 4 3	1,622	894	0 8 10	1,656	1,039	0 10 0
II	107	...	...	...	325	1,252	3 13 8	3,698	1,910	0 8 3	4,023	3,162	0 12 7
2	130	...	...	...	359	1,397	3 14 3	5,320	2,804	0 8 5	5,679	4,201	0 11 10

28. We learn from the above statement, looking at the average rates, that the waste lands are a good deal inferior in value to those occupied, and that they represent a comparatively small proportion of the total arable area. To what extent waste land has been included in occupied fields, at the time of measurement, I cannot state with any accuracy, but there can be no reasonable doubt that, as regards at any rate the dry lands, a good many strips have been pointed out by the ryots as covered by their pattas when in reality they had no claim whatever to such lands. In all Taluks we find the propensity of the land-holders has been to show as much land as they possibly could, and in some cases it is a positive advantage that they should do so and thus secure convenient boundaries to their fields, but in other cases they show too much and although the fault has been their own, it is usual to deduct such lands from their occupancies and make it into separate survey numbers and enter it as unoccupied.

29. The area and assessment of the minor inam lands in the villages under report are shown below:—

Result of the proposed rates on minor inam lands.

Group.	No of Villages.	Garden.			Rice.			Dry Crop.			Total.		
		Acres.	Assessment.	Average Rate.	Acres.	Assessment.	Average Rate.	Acres.	Assessment.	Average Rate.	Acres.	Assessment.	Average Rate.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
I	23	1	5	5 0 0	212	1,200	5 10 7	310	201	0 10 4	523	1,406	2 11 0
II	107	1	2	2 0 0	501	2,426	4 13 6	777	457	0 9 5	1,279	2,885	2 4 1
2	130	2	7	3 8 0	713	3,626	5 1 4	1,087	658	0 9 8	1,802	4,291	2 6 1

30. The next statement shows the area and assessment of the whole arable area, Government occupied, waste and Inam, in contrast with the old collections in each group :—

Total result of the proposed assessment contrasted.

Group.	Number of Villages.	Old.		New.							
				Occupied.		Waste.		Inam.		Total.	
		Bijvari.	Collections.	Acres.	Assessment.	Acres.	Assessment.	Acres.	Assessment.	Acres.	Assessment.
1	2	3	4	5	6	7	8	9	10	11	12
I	23	358	8,237	5,054	11,165	1,656	1,039	523	1,406	7,233	13,610
II	107	1,161	27,354	16,340	35,456	4,023	3,162	1,279	2,885	21,643	41,503
2	130	1,519	35,591	21,394	46,621	5,679	4,201	1,802	4,291	28,875	55,113

31. The general effect of the settlement will be understood from the following statement which places the old and new average rates in contrast under each head :—

General effect of the proposed settlement.

Description.	Acres by Survey.	Old.		New.	
		Collections.	Average Rate.	Assessment.	Average Rate.
1	2	3	4	5	6
Garden	88	195	2 5 7	381	4 9 5
Rice	7,225	30,511	4 3 7	37,357	5 2 9
Dry Crop	17,086	4,885	0 5 7	8,883	0 10 2
Total.....	21,394	35,591	1 10 7	46,621	2 2 10

32. The only point of any importance in the above statement is the increase in the average rate on rice land. An average rate of Rs. 5—2—9 is certainly higher than usual under maximum rates such as I have proposed for rice, *viz.* Rs. 9 and Rs. 8 and is due to the high capabilities of the land. In Belur, the only adjoining settled Taluk, the average rice rate with maximum rates as shown in the margin was Rs. 3-14-3. The villages under report however occupy a comparatively small area and the rice lands are far more uniform in quality than in Belur, and, as the classification shows, decidedly superior on the whole. The difference in the maximum rate of the first group in Belur and the first group now proposed is only 8 annas and is perfectly justifiable, considering the relative position of the two tracts, with reference to roads and markets. I consider that the villages of Hassan now under report enjoy quite as good a climate as Belur for rice cultivation, and a decided superiority in their position with reference to trade.

Group.	Maximum Rice Rate.		
I	8	8	0
II	8	0	0
III	7	8	0
IV	7	0	0

33. The average rice rate as above explained is Rs. 5-2-9 ; the average existing rate given by the Deputy Commissioner at para 14 is Rs. 5-4-0 per acre. I mention this, not with the object of justifying my proposals, for we know as a matter of fact that a rate of Rs. 5-4-0 was never imposed comprehensively, although no doubt it was exceeded in a good many instances. The Deputy Commissioner states that such rates were paid cheerfully, so we may fairly suppose that they were really applied in some instances.

34. At para 8 the Deputy Commissioner states the yield of an acre of wet land to be about 5 khandis of paddy equivalent to 5 pallas or(of?) 100 lbs (?) of rice per acre. There is evidently

some mistake here for, in the next few lines, the palla is said to contain 100 seers=200 lbs of rice. So far as I can understand the figures, the Deputy Commissioner puts down the yield at 5 pallas of *rice* per acre which at 8 Rs. per palla would represent Rs. 40. The khandi, I believe, for selling purposes is estimated at 160 pakka seers which would give 800 seers as the out-turn of paddy to the acre. This is not in my experience a very heavy out-turn and I have no doubt it is often exceeded.

35. The garden rates require no particular remark. In the case of dry crop lands the survey average rate is Rs. 0—10—2, the average rate given by the Deputy Commissioner as at present in force being Rs. 0—11—7 per acre. The proposed dry crop assessment is exceedingly light and will, I am convinced, be considered so by the ryots. It does not follow however that they will not resign some land at the settlement, but if they do the assessment will have little or nothing to do with it. As I have before remarked, no doubt a good deal of land really waste has been pointed out by the wargdars as occupied, probably in the hope of retaining it free of assessment or at any rate to see if the survey rates will not be exceedingly low. If the ryots really want the land such rates as are now proposed will not be found deterrent.

Grazing.

36. The realizations from the sale of grazing and fruit trees seem to have been insignificant. Village common grazing ground has always been granted free and it would in my opinion be inadvisable to set aside much land at the settlement for auction sale of the grazing. Some lands however must be so set aside where there are waste lands far in excess of the requirements of the village.

Local Cess.

37. The one anna local fund cess in 1879-80 brought Rs. 2,369 ; under the proposed settlement the amount will be Rs. 2,914 on the occupied Government land and Rs. 268 on the minor inam lands, in all Rs. 3,182.

Comparison of assessment with past collections.

38. The realizations of 1879—80 are compared below with the estimated results of the proposed settlement :—

	Rs.
Land revenue, 1879—80	35,591
Local cess of one anna	2,369
Total under old system.....	37,960
Survey assessment of occupied land	46,621
Local cess of one anna	3,182
Total under new or survey system...	49,803

Gross gain to Government.

39. Leaving out all calculation of local cesses there is a gross gain of Rs. 11,030, but that amount is liable to deductions as follows :—

40. First a sum not far short of Rs. 3,000 will be required to place the pay of village officers on a proper footing. This sum may literally be said to go back into the country and will be paid to the class whose assessment is chiefly raised by the settlement now proposed.

Irrigation Fund.

41. A sum of Rs. 1,110 will, in accordance with Chief Commissioner's Order No. 6223—R. 1093, dated 25th January 1881, be set aside out of the ordinary assessment as a contribution to the irrigation fund.

Net gain to Government.

42. Thus, as shown in the two preceding paras, the gross gain of Rs. 11,030 will be practically reduced by a sum of Rs. 4,110, leaving a net gain of, in round numbers, about Rs. 7,000, provided all the land now shown as occupied be retained at the settlement which I do not expect. I think we must be prepared for the resignation of some land, but I have no doubt the net results after the settlement will be more favorable to Government than in any previous year. The villages reported on are decidedly substantial and prosperous in comparison with the greater part of the Province and they enjoy great advantages in climate and facility in disposing of surplus produce, but still I do not think there is just at present sufficient capital and labor to cultivate at once the whole area pointed out as occupied, which I believe to be in excess of what can fairly be claimed as covered by the ryots' pattas. The area of dry cultivation also is likely to fluctuate year by year in a country where, in some parts at least, that cultivation is attended with considerable uncertainty. I do not think that it would be safe, in the just interest of Government, to pitch the assessment lower than above shown. Resignations of land at the settlement will not depend upon the weight of the assessment but upon the ability and inclination of the ryots to cultivate. No pitching of the rates lower would ensure the land not being thrown up. If the people find they have the agricultural stock and means to cultivate all the land now entered as occupied, they will certainly not throw any of it up, but if they find that some contraction of their holdings, to suit their means, is advisable, they will not hesitate to relinquish a few fields. So long as the rates are at all appreciable this will be the case. The rates I have proposed are quite justifiable by experience in taluks already settled and will I believe work well.

43. I attach to this report the papers noted in the margin, together with the usual class-war statement marked A and a list B of Inam villages with the kind of survey to which they have been submitted.

1. Survey Superintendent's letter No. 570, dated 29th July 1880, to the Deputy Commissioner, Hassan District.
2. Hassan District Deputy Commissioner's letter No. 688 of 20th September 1880 with its accompaniments.
3. Classing Officer's report of the 15th January 1881.

44. I shall be prepared to give out the rates about 1st of May and shall feel much obliged by an early sanction.

I have the honor to be

Sir,

Your most obedient Servant,

J. P. GRANT,

Supt., Revenue Survey & Assessment, Mysore.

No. G. 20.

DEPUTY COMMISSIONER'S OFFICE,
HASSAN DISTRICT,
Dated 9th April 1881.

From

The Deputy Commissioner, Hassan District.

To

The Superintendent, Mysore Revenue Survey.

SIR,

Referring to your letter No. 130 of the 23rd February 1881 to the Survey Commissioner, containing your proposals for the introduction of the Survey settlement into the three Malnad Maganis of the Hassan Taluk, I have the honor to submit the following remarks.

2. I must premise by saying that it would have been more convenient if the whole taluk had been brought under the uniform system of the Survey settlement at one and the same time; but having regard to the delay which will necessarily take place before the preliminary work is concluded in the remaining portion of the taluk, I shall not object to the proposed partial introduction at once.

3. Without entering into details I may be permitted to state that the maxima of rates adopted both for dry and wet lands are generally felt to be somewhat higher than the capabilities of the tract could bear. The argument based upon Colonel Hill's average of rates is in my humble opinion faulty. From the rates recorded in the accounts he arbitrarily strikes an average by dividing the total of rates by their number. But, as is universally known, the recorded rates are no indication whatever of the actual rate in existence, as the extent of the land comprised in each holding is always much more and rarely somewhat less than the recorded area. This uncertainty in the extent materially alters the average rate so plausibly apparent, and as calculated by you in para 18 of your letter under reference, the process of arriving at the average rate adopted by Colonel Hill will be seen to be fallacious. The cheerfulness with which the ryots are said to pay their kandayam, rather refers to the lump sum paid on the whole extent of the holding than to the rate arrived at by Colonel Hill by arbitrary calculation.

4. In order to understand Colonel Hill's calculation of the yield of rice per acre, it is necessary to point out that according to the prevailing rates of exchange 240 seers of paddy produce 100 seers of rice, so that each acre of wet land must produce 1,200 seers of paddy in order to fetch five pallas of rice. In other words, each Krishnaraj khandi of 10,000 square yards is said to produce about 15 khandis of paddy of 160 seers—not a very ordinary rate of production, and especially so if it is borne in mind that generally in nearly all cases of wet cultivation there is, as it were, a middleman between the Government and the actual cultivator of the land, to wit, a Brahman or other non-cultivating pattadar. Colonel Hill himself states that "it is well known that the yield is not great," but the figures given by him are not in accordance with this accepted theory of the capacity of production.

5. The average price of Rs. 8 per palla of rice is, in my humble opinion, rather too high. The figures quoted in para 21 of your letter under reference do not show that this price can be sustained throughout the long period during which the Survey settlement runs, and, as a matter of fact, rice was sold for 6 Rs. and under during the last season per palla. Without venturing to predict the effect which the extension of the Railway may have upon prices, I may safely state that 8 Rs. is too high an average for the purposes of our present calculation.

6. I cannot of course take exception to the relative positions which you accord to the Belur Taluk and the three maganis of the Hassan Taluk under settlement; but having regard to the uniformity of the quality of the rice land, and the increase which under such circumstances, even a lower maximum rate, will add to the lump sum to be collected from the same number of people—although individually there will be many inequalities in the increase and decrease which it is impossible to avoid—I would respectfully submit for your consideration whether the same maximum as has been adopted for Belur should not be adopted in the present instance also. I have not the means of calculating as to what the average will be if that maximum rate is adopted, but it will be fairly intermediate between Rs. 4—3—7 the existing average, and Rs. 5—2—9 the proposed average. Considering that there is a large increase provided for over the present revenue, I think a small portion of it may be very equitably given up in the interests of the ryots.

7. The revenue from dry land is quite doubled, and the average rate adopted is higher than even the highest extremes quoted in para 19 of your letter under reference. In the village of Palya the highest rate is only Rs. 0—7—8, whereas the average proposed to be adopted in the impending settlement is Rs. 0—10—2. I am not sure that the high rate, stated by Colonel Hill as being the

average, has been imposed in many cases. Even if such rates should have been accepted by the ryots for the lands recently taken up, they are small bits here and there and should not have any weight in settling on scientific principles a large tract of land. It should not be forgotten that dry land was enjoyed almost for nothing as a necessary appendage to wet cultivation, and this privilege was valued even when the rights of Government in forest land were not so scrupulously guarded as against the cultivating ryots. The tendency of the modern Government is to restrict the ryots' privileges in all the other departments, and such being the case, I would particularly urge upon your notice the desirability of giving the Malnad ryots more facilities as regards their dry land than in the other parts of the Province. I find that the average rates in Belur vary from 13—3 to 8—8, reducing the gross average to 9—9, which is less than the present average. I cannot presume to suggest a rate, but I have felt it my duty to bring to your notice some of the points which in my humble opinion deserve consideration.

8. Another request which I shall earnestly urge for your consideration is that the Survey numbers may not be made very large. The cultivating capacity of our ryots is admittedly poor, and as recognized shares will gradually disappear, and as there will generally be one holder to each Survey number, the large extent which will be clubbed together in one number presses unduly upon him. I know by experience that this acts prohibitively upon many an intending cultivator, and a reference to split up Survey numbers in the Haranhalli Taluk is still pending in your Office. Judged by a money standard, I think no number should bear an assessment ordinarily of more than five or at the most 7 Rs.

9. I have nothing to say with regard to the garden lands, as they are small bits sparsely situated far apart.

10. The enquiries which I made about carts bear out the statistics collected by your classing establishment, but not so the figures about population. I herewith send a statement showing the population according to the last census of the Government villages.

11. In conclusion, I beg to apologize for the delay in replying to this reference, which was unavoidable on account of my absence in Mysore during the Installation ceremonies.

12. The enclosures of your letter No. 131, dated 23rd February last, as per margin, are returned.

Letter No. 130, dated 23rd February 1881, to the Survey Commissioner.
Survey Superintendent's letter No. 370, dated 29th July 1880, to the Deputy Commissioner, Hassan District.
Hassan District Deputy Commissioner's letter No. 689, dated 29th September 1880, with its accompaniments.
Classing Officer's report of the 15th January 1881.
Classwar Statement marked A. A list B of inam villages.
A map of the three hobla under reference.

I have the honor to be

Sir,

Your most obedient Servant,

P. N. KRISHNA MURTI,
Deputy Commissioner, Hassan District.

PART I.

FORESTS.

Proceedings of the Dewan to His Highness the Maha Raja of Mysore, (Forests),—dated 27th April 1881.

No. 619—19, DATED BANGALORE, 27TH APRIL 1881.

ORDER.—In consequence of the departure on leave of Mr. Macpherson, Deputy Conservator of Forests, Ashtagram Division, and the desirableness of placing the administration of the forests, inclusive of the sandal operations, more immediately under the orders of the Deputy Commissioners as far as practicable so as to secure the support of the Revenue authorities in their preservation, the following arrangements are made in regard to the management of the forests in the several Districts.

2. The forests in the Districts of Hassan, Mysore, Bangalore Tumkúr, Kolar and Chitaldroog will be placed under the management of Native Forest Officers as detailed below under the immediate orders of the respective Deputy Commissioners. Mr. D. E. Hutchins, Assistant Conservator, will have the direct charge of the fuel plantations on the line of the Madras Railway, but in regard to the rest of the forests in the Districts above named, he will be simply required to inspect and report upon them periodically and to lay down instructions for the guidance of the Forest Officers employed, to conduct any special work in them and to act generally as a Consulting Officer to the Government.

3. Mr. T. Abdul Karim, Sub-Assistant Conservator, is placed in charge of the forests in the Mysore District. Mr. J. Stephens as a Probationer on Rs. 100 will be in charge of the forests in the Hassan District, and Probationer Narayan Rao in charge of the forests in the Bangalore District, whilst the Deputy Commissioners of Tumkúr and Kolar will be aided by a 1st and 2nd class Ranger respectively in the management of the forests in their respective Districts. The Deputy Commissioner of Chitaldroog will continue, as at present, to manage through the Revenue establishments the forests in that District, none of which is of any great importance.

4. *Bangalore District.*—The forest work in the Bangalore District inclusive of sandal operations will be conducted by Probationer Narayan Rao under the orders of the Deputy Commissioner. The Probationer whilst consulting and carrying out any orders which may be given to him by the Deputy Commissioner will be responsible for the successful administration of the forests, and his reports and returns will be forwarded to this Office through the Deputy Commissioner who will transmit the original reports and returns with any remarks or observations which he may consider it necessary to make on them.

5. The sales of sandal and any important contracts should have the approval of the Deputy Commissioner and should be conducted in his presence, and all appointments should similarly be made with his approval. The sandal operations should receive special attention from the Probationer both in view to economy in the operations and the prevention of smuggling as well as to the preservation and reproduction of the sandal.

6. The individual forests being placed in charge of Foresters selected from amongst the ryot classes on small rates of pay ranging from 7 to 12 Rs., the felling operations in the several forests may be conducted through their agency on small contracts, cartage being separately paid according to distance at rates which need not exceed 1½ annas per cart per mile where there are roads or cart tracks. Any Watchers required may also be advantageously selected from the local working population and need not be paid more than Rs. 5 per month. They will be expected to clear the fire lines and do all necessary work. For the Bilikal Forest, however, where an experienced and more intelligent Forester will be required, the present Forester on Rs. 20 may be retained. A few select men from amongst the existing Watchers may be also retained on Rs. 6 per month where required.

7. The next and even more important work devolving on the Probationer will be the supply of fuel to the Railway, on which work he is already engaged. The Probationer will be expected to supply the required quantity of fuel at all the stations from Bangalore to Maddur inclusive and in order to enable him to provide the fuel at the Maddur Station, the Huliyurdurga jungles of the Tumkúr District will also be placed in his charge, he corresponding with the Deputy Commissioner of the Tumkúr District on matters connected with the above jungles. The felling and preparation of the fuel should be carried on petty contracts on as favorable terms as could be obtained with proper arrangements for promoting reproduction in the forest; and arrangements should also be made in communication with the Railway authorities for bringing down the rejected fuel by the Railway to Bangalore on stated days of the week and selling it by auction from the wagons direct. A full report should be submitted of the arrangements made, the charges paid, the rates which should be charged to the Railway including a fair seigniorage to the Forest revenue and the proceeds realized by the sale of the rejected fuel.

8. As the Probationer's time will for the present at least be very largely taken up with the supply of the fuel for the Railway, and the superintendence of the sandal preparation at Bangalore, it will be desirable to place the forests in the southern parts of the District situated in the Kankanhalli and Anekal Taluks comprising the Ragihalli, Bilikal and Chellandadi forests, as well as the Basavanbetta forests transferred from Mysore in charge of a separate Ranger, under the orders of the Deputy Commissioner. Govinda Rao, now acting Ranger, will be appointed to this charge and placed for the present in the grade of a 2nd Class Ranger on Rs. 40 with 15 Rs. horse allowance instead of batta. He will be expected to attend under the orders of the Deputy Commissioner to the fire protection of the above forests, to the felling of sandal and fuel in them and generally to carry out such instructions as may be laid down by the Assistant Conservator for the improvement of the forests.

9. All the larger District forests excepting the small and unimportant jungle tracts in the immediate vicinity of villages which may be properly left to the villagers for conservancy and private use, may be advantageously amalgamated with the State forests, and the separate classification of the District forests abolished. In these forests no private rights of any kind should be recognized, and all timber, bamboos or fuel cut in them should be paid for at the prescribed rates. There should be no unnecessary restrictions on the felling of fuel or of bamboos except compliance with such rules as are required to promote reproduction in the forests, and except by way of assigning certain forests in the different taluks for felling by rotation.

10. The Foresters should see that the rules on the subject are carefully attended to. The persons carting the fuel or timber or bamboos should be provided with licenses to be delivered up to appointed officers on their entry into Bangalore. It is expected that under properly-conducted arrangements a considerable amount of revenue could be derived from the large quantities of fuel imported into Bangalore for consumption. The Deputy Commissioner, after consultation with the Probationer, should report the arrangements required to carry the above orders into effect.

11. It is believed that there are few tracts suited for plantations on the line of the Railway to Mysore; but where it is considered that plantations could be carried on with advantage, they will be managed by the Probationer.

12. *Tumkúr and Kolar Districts.*—The forests in the Tumkúr and Kolar Districts will be managed under similar arrangements by the Deputy Commissioners of the respective Districts who will be provided, the former with a Ranger of the 1st * Grade, and the latter with a Ranger of the 2nd † Grade, for the purpose, and Foresters and Watchers for the individual forests on reduced rates of pay as laid down for Bangalore.

*Pay Rs. 50 per month with Rs. 15 horse allowance instead of batta.

†Pay Rs. 40 per month with Rs. 15 horse allowance instead of batta.

13. The important Forests of Devarayadurga in the Tumkúr District and of Nundydroog in Kolar, which have been long and successfully conserved and protected from fire, should receive the special attention of the Deputy Commissioners, who will be held responsible for their successful protection from fire from year to year and for the improvement of the forests. The more highly-paid Foresters will be retained for the above forests and the written instructions which Mr. Hutchins will be asked to lay down for the proper up-keep of these forests and for the carrying on of the sandal and other plantations in them should be carefully attended to.

The Deputy Commissioners of the three Districts should submit an individual list of all the forests, State and District amalgamated in their respective Districts with the arrangements provided or proposed for the conservancy of each.

14. The Forest Rules will be revised with reference to the above, and separate instructions laid down for the submission of periodical reports and returns.

15. The sandal felled in the Tumkúr and Kolar Districts should continue to be sent to the Koti at Bangalore as at present.

16. Having in view the construction of a line of Railway to Tumkúr and beyond, the conservancy of fuel forests on the line should receive every attention, and the Kammar or Karachi timber forests on the Chiknayakanhalli ranges of hills will increase in value with improved facilities for transport.

17. The development of forest products, gall-nut, soap-nut, lac, tamarind, marking-nut, gerupoppu-nut, &c., should also receive every attention, and the attention of the Deputy Commissioners is specially drawn to the great importance of conserving the jungles on the crests of hills and about the sources and along the lines of streams.

18. The Government plantations along the line of the Madras Railway both in the Bangalore and Kolar Districts will continue to be managed by the Ranger now employed, under the direct orders of the Assistant Conservator Mr. Hutchins. The Apprentice Prahallada Rao should push on with the working plans of the Plantations on which he is now engaged.

19. Out of the existing Head-Quarter Office Establishment of the Assistant Conservator, the Office Establishment marginally noted will be provided for the Assistant Conservator as well as the Probationer in charge of the Forests in the Bangalore District, and the remainder dispensed with. The Deputy Commissioners of the three Districts in the Nundydroog Division will at once submit for approval nominal lists of the Forest Establishments proposed to be retained for their respective Districts, and the Assistant Conservator will submit a similar list of the Establishments for the Plantations.

For the Assistant Conservator.

1 Clerk on Rs. 40
1 Do 30
3 Peons 8 each.
1 Lascar on Rs. 7

For the Probationer.

1 Clerk on Rs. 30
1 Do 20
2 Peons on Rs. 7 each.

20. The Assistant Conservator is requested to submit a report clearly explaining what has been hitherto accomplished in regard to the plantations and forests in his Division and what remains to be done, and to draw up a memo of instructions on all the points requiring attention in regard to the forests for the information and guidance of the District Officers who will hereafter be in charge of them.

21. The Forests and Forest Establishments of the Mysore and Hassan Districts should be arranged in the manner already laid down for Bangalore by the Deputy Commissioners of the respective Districts with the Forest Officers appointed, and lists of the same should be submitted as early as practicable. The District forests should be amalgamated with the State forests, and men from the local ryot classes on low rates of pay should be employed wherever feasible as Foresters and Watchers, the latter being required to clear the fire-lines and do other forest work and not simply to act as peons.

22. The Office Establishment marginally noted is assigned to the Forest Officers of the above two Districts out of the existing establishments of the Deputy Conservator. The Head Clerk, Muttappa, should be sent up to this Office for being provided otherwise, and the remaining establishment dispensed with.

For the Sub-Assistant Conservator, Mysore District.

1	Clerk on ...	Rs. 40
1	Do	„ 25
1	Do	„ 20
2	Peons on ...	„ 7 each.
1	Lascar on...	„ 7

For the Probationer, Hassan District.

1	Clerk on ...	Rs. 25
2	Peons on ..	„ 7 each.

23. *Mysore District.*—The forests as well as the sandal operations in the Mysore District are of the greatest importance. Arrangements should at once be organized and reported for the efficient fire-protection of the important State-forests, for which purpose Rangers Mannar Pille and Venkat Rao will be retained, the latter as a 1st Class Ranger on 50 Rs. with 15 Rs. horse-allowance instead of batta, and the former on a special pay of Rs. 70 with 15 Rs. horse-allowance instead of batta. It has been learnt with disappointment that the Metikuppa forest, the only one which had been successfully protected in this Division, took fire in the current year. The Sub-Assistant Conservator and the Rangers will be held responsible for the efficient conduct of this work with the support of the Taluk authorities.

24. The sandal arrangements also demand special attention, both in view of substituting a more economical and efficient system for felling than the present contract system, and for securing economy in the cost of sandal preparation. The conservancy of the sandal reserves should be carefully attended to, as it is believed that the contract system which authorized the felling of greenwood by the contractors has led to the indiscriminate destruction of the sandal in places near the Head-quarters, without proper arrangements for leaving an abundant stock of good seed-bearing trees in every locality.

25. It may be advantageous and feasible to amalgamate the two existing sandal-kotis at Hunsúr and Seringapatam into a single koti at Mysore. This may however be deferred for the present. A list of the sandal-kotis and timber depôts with their establishments as now maintained should be submitted.

26. *Hassan District.*—In the Hassan District, the conservancy of the ghat timber forests and of the Hirikalgudda forest recently demarcated, and of all the sources of fuel supply in the vicinity of Hassan, as well as of the Vijiyapur and Bhaktarvalli sandal reserves and plantations should receive the special attention of the Deputy Commissioner and the Forest Officer. A sandal and timber depôt should be opened at Hassan with a limited establishment as noted in the margin to be provided out of the existing Ashtagram Forest Establishments, and all the sandal collected within the District should be prepared at this depôt for sale. The opening of a sandal depôt at Hassan will not only be attended with a large saving of the present cost of transport of the sandal to the Seringapatam koti, but will also facilitate the working of the sandal in the Belur and other taluks and also the adjoining taluks of the Kadur District which are now totally neglected. A portion of the District Jail-enclosure at Hassan may perhaps be made available for the sandal-koti.

1 Daroga on Rs. 30.
1 Mutsaddi on Rs. 15.
3 Peons at Rs. 6 each.

27. *Shimoga and Kadur Districts.*—In the Nagar Division, arrangements should be made for placing the forests in the Nagar, Ságar, Sorab and Shikarpur Taluks, inclusive of the sandal operations, which have not hitherto received sufficient attention, under the management of the Sub-Assistant Conservator Mr. Lovery under the immediate orders of the Deputy Commissioner. These officers should at once report the arrangements they would propose for converting the District forests in the above taluks into State forests, and for working them to the advantage of Government in the manner already indicated for Bangalore, and also for the management of the san-

dal operations. Two sandal-kotis for the above taluks at Anantapur and Sorab may be retained under the management of the Sub-Assistant Conservator.

The arrangements required for utilizing the above forests, especially those in the Sorab Taluk, for the supply of the great demand for timber which exists in the Dharwar District, as well as for meeting the demand for timber in the adjoining Maidan taluks should be reported. A timber depôt may be established either at Siralkoppa or Shikarpur.

28. The forests and sandal operations in the remaining taluks of the Shimoga District, *viz.*, Shimoga, Honnali, Channagiri and Kavaledurga, and in the adjoining taluks of the Kadur District, *viz.*, Tarikere, Lakvalli and Koppa, which comprise the three existing State forests and form a compact charge, will remain under the management of the Assistant Conservator Mr. Jellicoe. Two sandal-kotis at Shimoga and Tirthahalli would suffice for the sandal collected in them. The forests in the remaining taluks of the Kadur District, *viz.*, Chikmagalur, Múdgere and Banavar, will be under the management of the Deputy Commissioner assisted by a 2nd Class Ranger. But the sandal collected in these taluks may for the present be sent to the Hassan depôt for preparation.

29. The Assistant Conservator's attention is drawn to the arrangements required for the conservancy of the Ubrani forests, and it is hoped that the new arrangements would enable him to devote his undivided attention to the scientific conservancy and improvement of the three State forests in his charge which are situated in close vicinity of each other and not far from Shimoga.

30. The upper subordinates allowed for these two Districts are a Ranger on a special pay of Rs. 70 with 15 Rs. horse allowance instead of batta, under the orders of the Assistant Conservator for sandal collection and other works, and a 2nd Class Ranger on Rs. 40 pay with 15 Rs. horse allowance instead of batta, under the orders of the Deputy Commissioner of Kadur for the three taluks placed under his direct charge. The Office Establishments marginally noted are also provided for the Assistant Conservator and the Sub-Assistant Conservator out of the existing Head-quarter Office Establishments. The Assistant Conservator, in consultation with the Deputy Commissioners, should at once submit a complete nominal list of the Forest Establishments retained and dispensed with under these arrangements in the two Districts.

For the Assistant Conservator.

1 Clerk on Rs. 40
1 Do on Rs. 30
1 Do on Rs. 25
4 Peons on Rs. 8 each.
1 Lascar on Rs. 7

For the Sub-Asstt. Conservator.

1 Clerk on Rs. 25
2 Peons on Rs. 7 each.

31. Mr. Hutchins for the Nundydroog Division Forest Establishments and Mr. Abdul Karim for the Ashtagram Division Forest Establishments should submit a similar nominal roll of the establishments retained and dispensed with in the respective Divisions under these orders.

32. Under the separate arrangements made for the working of the border taluks of the Shimoga District by the Sub-Assistant Conservator, the Sandal Patrol Establishment temporarily entertained will no longer be required, and it should be dispensed with, retaining any small portion of it required for the management of the forests in these taluks by the Sub-Assistant Conservator.

PART I.

GENERAL.

Proceedings of the Dewan to His Highness the Maha Raja of Mysore, (General),—dated 18th April 1881.

READ—

Docket No. 15 of 5th April 1881 from the Deputy Commissioner, Bangalore, forwarding list of officials who have retired on compensation pension or gratuity in the late revision of establishments.

No. 285-99—1, DATED BANGALORE, 18TH APRIL 1881.

ORDER THEREON.—The order conveyed in Proceedings No. 7382—Gl. 1939 of 7th February 1881 need be applied only in regard to persons thrown out in connection with the recent reduction made in the Police Establishment, a list of such of them as are qualified for efficient work and whom it is necessary to provide for, should be submitted.

2. With regard to reductions made in the Revenue and other departments, the officials whom the Government have undertaken to provide for, have been specially retained as supernumeraries, while the claims of the others have been disposed of by award of pensions and gratuities. It is left to the Deputy Commissioners and other officers to appoint to vacancies any of them whom they consider fit for work, as their services were dispensed with not on any medical certificate.

R. VIJAYINDRA RAO,
Secretary.

To—The Deputy Commissioners.
